

# CHUTE WIZARD™

## GARBAGE & LINEN CHUTE WASHDOWN SOLUTION

The CanAm Chute Wizard® washdown solution is specifically for multi-residential buildings, with an industry-first, foaming and odour neutralizing liquid that utilizes your building's built-in garbage or linen chute washdown system.

After pioneering specialized garbage chute and compactor cleaning at multi-family properties across Canada 25 years ago, CanAm Waste has now made this task even easier. The CanAm Chute Wizard® liquid is a penetrating foam odour neutralizer concentrate that mixes with your building wash down system to break up heavy soils, grease and leachate on your garbage or linen chute walls.

Penetrating action reduces grease build-up on the sides of the chute that causes fire hazards and minimizes the nasty garbage smells traveling up the chute. Application is as simple as adding CanAm Chute Wizard® into the washdown system and turn on!

The penetrating liquid foam mixes with the existing wash down system and 1 gallon jug!

- No Need to Close Chutes During Cleaning
- No Resident Inconveniences
- No Contractor Scheduling Headaches
- Grips Surface of the Chute
- Dissolves Heavy Soils and Grease
- Minimizes Foul Odours in Chute
- Simple to Use. Superior Results!
